Functions changes

1. DTMF (dual tone multi frequency) and # detection improvements.

Bugs solved

Version No. v21.05.02

2015-08-06

Issued by: Robertas Charževskis

New Functions

Functions changes

Bugs solved

1. The issue with adding of the User's phone numbers, when phone numbers entered starting with an international country code (with +), solved. In some cases system did not send SMS notification and did not make a phone call to the Users.

Version No. v21.05.01

2015-07-03

Issued by: Robertas Charževskis

New Functions

1. Reliability of the system improved to prevent the infinite SMS text messages transmission. You can set day and month SMS limits (default settings day limit – 25, month – 400), when system will reach one of these limits it will block all outgoing SMS for 30 days (after system start or service activation) and inform Admins by SMS. Admins are able to activate SMS service by SMS xxxx removeban (xxxx - digital SMS password, removeban – command) otherwise SMS service will be activated automatically after 30 days.

2. New configuration of the main settings added - Enable Periodic Info over SMS or / and GPRS. If “Enable Periodic Info SMS” is enabled, unit sends periodic info SMS to User1.

2.1. Default setting – SMS Enabled.

2.2. Default setting – GPRS Enabled.

2.3. New SMS commands:

2.3.1. ssss_INFO:SMS_ON;

2.3.2. ssss_INFO:SMS_OFF

3. SMS forward function added.

4. Control of wired PGMs from IP Receiver Software (EGR100) added.

Functions changes

Bugs solved

Version No. v21.04.05
